U.S. Immigration and Customs Enforcement (ICE)
Detainee Death Report: NUNEZ Caceres, Luis

Immigration History

Mr. NUNEZ Caceres, a 42-year-old male citizen of Honduras, entered the United States at an unknown date and location without inspection or authorization. On November 17, 2025, he was encountered and arrested by Enforcement and Removal Operations (ERO) Houston Fugitive Operations. He was initially processed at the Montgomery Processing Center (MPC) in Conroe, Texas, and later transferred to the Joe Corley Processing Center (JCPC) on November 25, 2025. Removal proceedings were initiated, and a master calendar hearing was scheduled for January 13, 2026.

Synopsis of Events

Upon intake at MPC on November 19, 2025, Mr. NUNEZ Caceres was found to have a history of hypertension, hyperlipidemia, and congestive heart failure, and was placed in medical housing for respiratory isolation and tuberculosis testing. He was also diagnosed with diabetes mellitus during his stay. His medical management included regular monitoring, medication for his chronic conditions, and referrals to specialists as needed.

After transfer to JCPC, Mr. NUNEZ Caceres continued to receive care for his multiple chronic conditions, including diabetes, hypertension, hyperlipidemia, congestive heart failure, and a history of coronary artery disease with previous bypass surgery. He was prescribed and administered appropriate medications, and his health status was regularly assessed by medical staff.

From November 29 to December 22, 2025, Mr. NUNEZ Caceres reported symptoms including congestion, chills, and leg swelling, which were addressed by facility medical staff. On December 22, he was transported to Conroe Regional Medical Center (CRMC) for evaluation of swelling and urinary symptoms. After briefly returning to JCPC, he exhibited respiratory distress and was sent back to CRMC via ambulance.

From December 23 to 30, he was admitted to CRMC for congestive heart failure exacerbation and received treatment from a multidisciplinary team. On December 31, he suffered cardiac arrest, was resuscitated, and transferred to the intensive care unit. From January 1 to 4, 2026, he remained under intensive medical care. On January 5, he experienced three episodes of cardiac arrest and was pronounced deceased at 4:31 a.m.
