FACILITY OVERVIEW

The U.S. Immigration and Customs Enforcement (ICE) Office of Professional Responsibility (OPR) Office of Detention Oversight (ODO) conducted an inspection of the Monroe County Detention-Dorm (MCDD) in Monroe, Michigan, from July 14 to 16, 2026.[1] The facility opened in 2000 and is owned by Monroe County and operated by the Monroe County Sheriff's Office. The ICE Office of Enforcement and Removal Operations (ERO) began housing detainees at MCDD in 1995[2] under the oversight of ERO's Field Office Director in Detroit (ERO Detroit). The facility is a non-dedicated ICE detention facility and operates under the National Detention Standards (NDS) 2026.

ERO has deportation officers assigned full-time to the facility. They are on-site daily, Monday through Friday, from 7:00 a.m. to 3:00 p.m. A jail administrator handles daily facility operations and manages (b)(7)(e) personnel. Continental Café, LLC provides food services, VitalCore Health Strategies provides medical care, and Keefe Commissary Network provides commissary services at the facility. In August 2023, MCDD was audited for the Department of Homeland Security (DHS) Prison Rape Elimination Act (PREA) and was found DHS PREA compliant.

Capacity and Population Statistics	Quantity
ICE Bed Capacity[3]	(b)(7)(e)
Average ICE Population[4]	(b)(7)(e)
Adult Male Population (as of July 14, 2026)	(b)(7)(e)
Adult Female Population (as of July 14, 2026)	(b)(7)(e)

During its last inspection in Fiscal Year (FY) 2025, ODO found 1 deficiency in Medical Care.

[1] This facility holds male detainees with low, medium-low, medium-high, and high security classification levels for periods greater than 72 hours.
[2] ERO Detroit began housing detainees in the older MCDD facility until the new one opened in 2000.
[3] Data Source: ERO Custody Management Division Authorized Facility List as of July 9, 2026.
[4] *Ibid.*

INSPECTION PROCESS

ODO conducts the following annual and biennial oversight inspections of ICE detention facilities to assess and rate each facility's compliance with their contractually obligated detention standards as noted in the Facility Overview section above.

- Dedicated facility: ODO conducts annual on-site inspections of dedicated inter-governmental service agreement (IGSA) facilities, contract detention facilities (CDF), family residential centers, and service processing centers.

- Non-dedicated IGSA facility:
  - For facilities with an average daily population (ADP) of 50 or more, ODO conducts biennial on-site inspections.
  - For facilities with an ADP of 50 or less,
    - If the facility has not previously had a rated ODO inspection, then ODO conducts an initial on-site inspection, and
    - If the facility has had an ODO inspection, then the facility completes a biennial ODO-assisted self-inspection process (OASIP).

- U.S. Marshal Service (USMS): USMS CDF and intergovernmental agreement facilities complete biennial OASIPs.

In FY 2025, ODO implemented OASIPs, which replaced the annual Special Review inspections ODO conducted at most low ADP and/or short-term use facilities. This new inspection framework is more reflective of the actual operation demand of facilities with a low ADP and/or short-term use. OASIP inspections focus on facility compliance with detention standard requirements that directly affect detainee life, health, safety, and/or well-being. Facilities have 30 calendar days to complete the OASIP inspection and ODO staff will go on-site for 1 day towards the end of the 30-day inspection window to observe facility conditions, interview ICE detainees, and spot-check the facility's reported findings.[5]

ODO defines a "deficiency" as any violation of detention standards, policies, or operational procedures, as applicable. ODO highlights instances when the facility resolves deficiencies prior to the completion of the ODO inspection as corrective actions. Where applicable, these corrective actions are annotated with a "C" in the *Inspection Findings* section of the report.

Upon completion of each inspection, ODO conducts a closeout briefing with facility and local ERO officials to discuss preliminary findings. ODO shares a summary of these findings with ERO management officials. Thereafter, ODO provides ICE leadership with a final report to: (i) assist ERO in developing and initiating uniform corrective action plans (UCAPs); and (ii) provide senior executives with an independent assessment of facility operations. ODO's findings inform ICE executive management in its decision-making to better allocate resources across the agency's entire detention inventory.

[5] When ODO conducts on-site inspections for non-OASIP facilities, the facility is notified 4 weeks before the inspection and ODO is on-site for 2-3 business days conducting the inspection.

DETAINEE RELATIONS

ODO interviewed 21 detainees, who each voluntarily agreed to participate. None of the detainees made allegations of discrimination, mistreatment, or abuse. All detainees reported satisfaction with facility services.

INSPECTION FINDINGS

SECURITY

FACILITY SECURITY AND CONTROL (FSC)

ODO reviewed 25 entries in the facility visitor logbook between June 30, 2025, to June 30, 2026, and found 25 out of 25 entries, the entries did not identify the person or department visited, date and time of visitor's arrival, purpose of visit, or time of departure **(Deficiency FSC-18[7])**.

CARE

MEDICAL CARE (MC)

ODO reviewed 25 detainee medical records and found in 1 out of 25 records, medical staff read a detainee's purified protein derivative (PPD) tuberculosis skin test 36 hours after medical staff planted the PPD instead of the minimum 48-hour per Centers for Disease Control's guideline **(Deficiency MC-18[8])**. **This is a priority component**.

[7] "Every entry in the logbook will identify the person visiting; the person or department visited; date and time of visitor's arrival; purpose of visit; and time of departure." *See* ICE NDS 2026, Standard, Facility Security and Control, Section (II)(C)(2)(b).

[8] "All new arrivals shall receive tuberculosis (TB) screening in accordance with the most current Centers for Disease Control and Prevention (CDC) guidelines, including, but not limited to, CDC Guidelines for Correctional Facilities, prior to being placed in general population." *See* ICE NDS 2026, Standard, Medical Care, Section (II)(D)(3).

CONCLUSION

During this inspection, ODO assessed the facility's compliance with 34 standards under NDS 2026 and found the facility in compliance with 32 of those standards. ODO found two deficiencies in two standards. Although ODO conducted a prior inspection of MCDD, ODO cannot perform an analysis due to the change in standard from NDS 2019 to NDS 2026. ODO recommends ERO Detroit continue to work with the facility to resolve the deficiencies that remain outstanding in accordance with contractual obligations.
